PROFESSIONAL SUMMARY

Senior Full Stack Developer with 7.9+ years of professional experience building SaaS platforms, enterprise applications, REST APIs, HRMS/Payroll/LMS systems, and business automation solutions. Strong PHP/Laravel foundation with hands-on experience in Node.js, React.js, MySQL, PostgreSQL, authentication, third-party integrations, AWS, Docker, and CI/CD. Own architecture, database and API design, business logic, debugging, validation, deployment, and production delivery. Practical experience with LLM integration, OCR, speech-to-text, workflow automation, and AI-assisted engineering.

CORE ENGINEERING FOCUS

Backend API Development | SaaS Product Development | AI Workflow Automation | Database Design & Query Optimization | Third-Party API Integrations | Payment Gateway Integrations

TECHNICAL SKILLS

Backend & Full Stack: PHP, Laravel, Node.js, Express.js, React.js, JavaScript, TypeScript, CodeIgniter, Angular

Databases & APIs: MySQL, PostgreSQL, SQL Server, REST APIs, database design, query/index optimization, JWT, OAuth2, Role-Based Access Control

Cloud & DevOps: AWS EC2/S3, Docker, GitHub Actions, CI/CD, DigitalOcean, Hostinger VPS

Integrations & Payments: Microsoft Graph, Google, Zoom, Dropbox, Microsoft Planner; Stripe, Razorpay, PayPal, Paddle

AI & Automation: OpenAI/GPT, Gemini, Tesseract OCR, Speech-to-Text, LLM integration, document processing, workflow automation

AI-Assisted Engineering: OpenAI/Codex, Claude, and Gemini for scaffolding, codebase analysis, debugging, refactoring, test generation, documentation, and API integration

Tools & Frontend UI: Git/GitHub, Postman, Swagger, HTML5, CSS3, Bootstrap, Tailwind CSS

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer

Apr 2023 - Present

Webetron Technology Pvt Ltd

Environment: Laravel/PHP, Node.js, React.js, MySQL, PostgreSQL, REST APIs, AWS, Docker, GitHub Actions, CI/CD

- Design and deliver HRMS, Payroll, LMS, SaaS, and business automation modules using Laravel/PHP, Node.js, React.js, MySQL, and PostgreSQL.
- Own application architecture, database and REST API design, business logic, integration decisions, debugging, validation, deployment, and production delivery for assigned solutions.
- Build JWT-authenticated APIs and integrate Microsoft Graph, Google, Zoom, and other third-party services.
- Support delivery using AWS, Docker, GitHub Actions, and CI/CD.
- Implement OpenAI/Gemini-enabled document processing, OCR invoice workflows, speech-to-text task creation, and workflow automation.
- Use AI-assisted development for codebase analysis, scaffolding, debugging, refactoring, tests, documentation, and API integration while personally reviewing production code.

PROFESSIONAL EXPERIENCE (CONTINUED)

Senior Software Developer

Apr 2021 - Mar 2023

Softnice India Pvt Ltd

Environment: Node.js, Laravel, MySQL, Role-Based Access Control, Search, Reporting, Dashboards

- Developed backend functionality for Enlist India, a job portal, using Node.js.
- Developed backend modules for business applications using Laravel and MySQL.
- Implemented role-based access control, advanced search, reporting, and dashboard functionality.
- Optimized database queries, joins, and indexes, and maintained backend business logic for production Laravel applications.

Software Developer

Sep 2020 - Apr 2021

Weblogysphere Technology Pvt Ltd

Environment: Laravel, Node.js, REST APIs, Google, Microsoft, Dropbox

- Developed API-driven applications using Laravel and Node.js with modular backend architecture.
- Integrated Google, Microsoft, and Dropbox services.

Full Stack Developer

Jan 2019 - Aug 2020

WebbyButter Technology Pvt Ltd

Environment: Laravel, Angular, RESTful APIs, JWT, OAuth2, enterprise APIs**Project: QRFlyer** | Laravel, Angular**Scope & contribution:** Worked on QRFlyer application development using Laravel for the backend and Angular for the frontend.**Project: Logistics Projects** | Angular, RESTful APIs**Scope & contribution:** Developed Angular application functionality and integrated RESTful APIs for logistics applications.

- Built enterprise applications using Laravel and Angular.
- Implemented JWT/OAuth2 authentication.
- Developed financial and operational API modules.

SELECTED PROJECTS

Identra Pro - Identity & Smart Attendance SaaS Platform

Technology: Laravel, Node.js, React.js, MySQL, REST APIs

Multi-tenant SaaS platform covering identity management, smart attendance, tenant administration, and subscription/payment workflows.

- **Identity & attendance:** Built identity management, smart attendance, and ID card functionality.
- **Tenant administration:** Developed tenant portals and administrative dashboards within the multi-tenant platform.
- **Subscriptions & payments:** Implemented subscription plans, pricing, agent wallet, and payment workflows.

SELECTED PROJECTS (CONTINUED)

AI Factory Task Recorder - Speech-to-Text

Technology: Node.js, OpenAI, Microsoft Planner API, Power Automate, SharePoint, Teams Adaptive Cards

Hinglish voice-to-task workflow that creates structured tasks, reminders, and KPI tracking.

- **Voice-to-task processing:** Built the speech-to-text task-recording workflow using Node.js and OpenAI.
- **Task automation:** Integrated Microsoft Planner API and Power Automate into the task-creation workflow.
- **Microsoft integrations:** Connected SharePoint and Teams Adaptive Cards as part of the task-recording solution.

OCR-Based AI Purchase & Invoice Dashboard

Technology: Laravel, Node.js, React.js, Tesseract OCR, OpenAI/GPT, MySQL, AWS S3

OCR and LLM invoice-processing workflow for extracting information and identifying anomalies in scanned invoices.

- **Invoice extraction:** Built a workflow to extract vendor data, invoice line items, and totals from scanned invoices.
- **OCR & LLM integration:** Used Tesseract OCR and OpenAI/GPT for document processing within the purchase and invoice dashboard.
- **Anomaly identification:** Included invoice anomaly identification alongside the extracted invoice information.

HRMS & Payroll + Enterprise LMS

Technology: Laravel, Node.js, React.js, MySQL/PostgreSQL, AWS

Business application modules covering HR, payroll, employee learning, and administrative analytics.

- **HRMS & payroll:** Developed payroll, attendance, and employee lifecycle functionality.
- **Enterprise LMS:** Built course management, progress tracking, and assessment modules.
- **Administrative analytics:** Implemented administrative analytics modules within the HRMS, payroll, and LMS solution.

EDUCATION & EARLY CAREER TRAINING

B.E. Electronics & Communication	2013 - 2017
ITM Vadodara University	
PHP Trainee	Nov 2017 - Jul 2018
TOP Technologies	
Web Developer Intern	Sep 2018 - Dec 2018
TaxSmart Technologies Pvt Ltd
